

**TIER 3 PUBLIC NOTICE**  
**IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER**  
**Monitoring Requirements Not for V**

Our water system violated drinking water standards over the past year. Even though these were not emergencies, as our customers, you have a right to know what happened and what we did to correct these situations.

We are required to monitor your drinking water for specific contaminants on a regular basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. During the required time frame we ["did not monitor or test" or "did not complete all monitoring or testing"] for [contaminant(s)] and therefore cannot be sure of the quality of our drinking water during that time.

The table below provides a summary of monitoring requirements for which we received a violation:

Contaminant	Required sampling frequency	Number of samples taken	When samples should have been taken	When samples were taken
<b>Example: VOCs</b>	1 sample every three years	0	2000-2002	February 2003
<b>Example: Lead and Copper</b>	Samples at the tap every six months.	0	January to June 2024	June 2025
<b>Example: Water Quality Parameters</b>	Samples at each entry point to the distribution and specified locations in the distribution system every six months.	0	January to June 2024	July 2024

**What should I do?**

There is nothing you need to do at this time. There are no health effects due to missed monitoring. However, because there is no data for the monitoring period noted above we can not be sure of the levels of lead and copper in the water during that time.

**What is being done?**

[Since the 5 samples were missed in 2024, all 10 samples were taken 2025 with no high levels of Lead and Copper triggers.]

For more information, please contact [Verde Glen DWID] at [480-488-5353] or [232 S. Conifer Dr.].
